## DIASOURCE LAUNCHES 13 NEW ANTIBODIES AT AACC!

Dear Customer,

We are very excited to launch **13 new Antibodies** at AACC 2019.

We are continuously expanding our portfolio with niche, high valued parameters. For many years now, DIASource is a recognized supplier of high quality and unique Antibodies dedicated to the IVD manufacturers. These new launches consolidates our position on the market, with an enlarged portfolio of proven and performing Antibodies.

We are launching **Monoclonal** and **Polyclonal Antibodies** in the fields of **Diabetes & Metabolism, Kidney disease, Bone Metabolism, Cardiovascular & Salt Balance, Anemia, Fertility and Inflammation.**

These new products will be available **in September 2019.**

### Adiponectin

Adiponectin is a marker of obesity, metabolic syndrome, diabetes and cardiovascular diseases.

Type	Size	Clone/Host	Format
Monoclonal	1 mg	OBV 1	Purified Unconjugated
Polyclonal	100 µg	Sheep	

### Fatty Acid-Binding Protein 4 (FABP4)

FABP4 is implicated in atherosclerosis, diabetes, inflammatory response, angiogenesis and ovarian cancers.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Sheep	Purified Unconjugated

### Cystatin C

Cystatin C is useful in the assessment of renal function in patients suspected of having kidney disease, and in monitoring the treatment response in patients with kidney disease. It is also a better index of Glomerular Filtration Rate (GFR) than Creatinine.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Sheep	Purified Unconjugated
		Rabbit	

### Cartilage Oligomeric Matrix Protein (COMP)

COMP can be used to monitor the cartilage deterioration in rheumatoid arthritis and osteoarthritis.

Type	Size	Clone/Host	Format
Monoclonal	1 mg	OBV 2	Purified Unconjugated
		OBV 3	

### N-terminal proatrial natriuretic peptide (NT-ProANP)

NT-ProANP serves as a helpful marker for the diagnosis of pediatric heart failure and follow-up of treatment and after operation in children.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Sheep	Purified Unconjugated

### Uromodulin

Lowered Uromodulin values are a sensitive marker of loss in renal function, particularly in the initial stage, when conventional markers are not really significant.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Sheep	Purified Unconjugated

### Soluble Transferrin Receptor (sTfR)

TfR is useful for the evaluation of suspected iron deficiency in patients who may have inflammation, infection, or chronic disease and other conditions in which ferritin concentration does not correlate with iron status, including cystic fibrosis patients and insulin-dependent diabetics who may have iron-deficiency resulting from gastric autoimmunity and atrophic gastritis.

Type	Size	Clone/Host	Format
Monoclonal	1 mg	OBV 4	Purified Unconjugated

### Placental Protein 13 (PP-13)

PP-13 is a marker of preeclampsia and early-onset preeclampsia.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Rabbit	Purified Unconjugated

## Cathepsin K

Cathepsin K is a good indicator of bone mass and is involved with fractures.

Type	Size	Clone/Host	Format
Monoclonal	1 mg	OBV 5	Purified Unconjugated

## Procalcitonin (PCT)

PCT is a general inflammation marker and can be used for the diagnosis and/or monitoring of bacteremia and septicemia, urinary tract infection, bacterial infection, septic shock, systemic secondary infection post-surgery, severe trauma, burns, and multiorgan failure, bacterial versus viral meningitis, bacterial versus viral pneumonia, and therapeutic response to antibacterial therapy.

Type	Size	Clone/Host	Format
Polyclonal	100 µg	Rabbit	Purified Unconjugated
