**\*Note B:** Some substances (acids, bases, etc.) are placed on the market in aqueous solutions at various concentrations and, therefore, these solutions require different classification and labelling since the hazards vary at different concentrations. In Part 3 entries with Note B have a general designation of the following type: 'nitric acid ...%'. In this case the supplier must state the percentage concentration of the solution on the label. Unless otherwise stated, it is assumed that the percentage concentration is calculated on a weight/weight basis.

## 4 FIRST AID MEASURES

### 4.1 Description of first aid measures

**General information** In general, in case of doubt or if symptoms persist, always call a doctor. Never give anything by mouth to an unconscious person.

**Following inhalation** If person experiences nausea, headache or dizziness, person should stop work immediately and move to fresh air until these symptoms disappear. If breathing is difficult, administer oxygen by a qualified person, keep the person warm and at rest. Call a physician. In the event that an individual inhales enough vapour to lose consciousness, person should be moved to fresh air at once and a physician should be called immediately. If breathing has stopped, artificial respiration should be given immediately. In all case, ensure adequate ventilation and provide respiratory protection before the person returns to work.

**Following skin contact** IF ON SKIN (or hair): Remove contaminated clothing. Rinse skin with water / with vegetable oil. Take a shower.

If irritation or rash occurs: Get medical advice.  
**Following eye contact** IF IN EYES: Rinse cautiously with vegetable oil for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
 If eye irritation persists: Get medical advice/attention.

**Following ingestion** IF SWALLOWED: Rinse thoroughly mouth with water. Immediately call a POISON CENTER/doctor.  
Do NOT induce vomiting.

**For emergency responders** No data available.

#### **4.2 Most important symptoms and effects, both acute and delayed**

**Symptoms** No data available.

**Effects** No data available.

#### **4.3 Indication of any immediate medical attention and special treatment needed**

Treat according to symptoms.

### **5 FIRE FIGHTING MEASURES**

#### **5.1 Extinguishing media**

*Appropriated:* Use water spray or other suitable agent on fires adjacent to non-leaking tanks or intact containers of acid. If only a small amount of combustibles is present, smother fire with dry chemical.

**Small fire:** Dry powder or CO<sub>2</sub>. Move containers from fire area, if it can be done without risk.

**Large fire:** Flood fire area with large quantities of water, while knocking down vapours with water fog. Cool containers with flooding quantities of water until well after fire is out. Do not get water inside containers. Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.

*Non-appropriated:* Do not use solid water streams near ruptured tanks or spills of sulfuric acid.

#### **5.2 Special hazards arising from the substance or mixture**

Acid reacts violently with water and can spatter acid onto personnel.

Reacts with most metals, especially when diluted: Hydrogen gas release, which is extremely flammable and explosive. Risk of explosion if acid combines with water, organic materials or base solutions in enclosed spaces. Mixing acids of different strengths/concentrations can also pose an explosive risk in an enclosed space/container.

#### **5.3 Advice for fire fighters**

Add chemical safety goggles if eye protection is not provided. Wear full protective clothing.

Evacuate personnel to a safe area. Keep personnel removed and upwind of fire. Wear full protective clothing. Neutralize run-off with lime, soda ash, to prevent corrosion of metals and formation of hydrogen gas. Wear self-contained breathing apparatus if fumes or mists are present.

### **6 ACCIDENTAL RELEASE MEASURES**

#### **6.1 Personal precaution, protective equipment and emergency procedures**

Evacuate all personnel from danger area.

Use required personal protective equipment.

Remove sources of ignition.

DO NOT smoke.

Stop flow if possible.

## 6.2 Environmental Precautions

Avoid release to the environment.  
Avoid contamination of drains, surface water and groundwater.

## 6.3 Methods and material for containment and cleaning-up

**SMALL SPILL:** Soak up with dry sand, clay or diatomaceous earth.

**LARGE SPILL:** Dike. Cautiously dilute and neutralize with lime or soda ash. Adequate ventilation is required during neutralization due to release of CO<sub>2</sub> gas. Transfer to waste water treatment system. Prevent liquid from entering sewers, waterways. Product not recovered or sent as waste for treatment should be reported to authorities.

## 6.4 Reference to other sections

Refer to sections: 7 safe handling, 8 for personal protective equipments, 13 for disposal.

# 7 HANDLING AND STORAGE

## 7.1 Precautions for safe handling

DO NOT get in eyes, on skin, or on clothing.  
DO NOT ingest: Avoid breathing vapours or mist.  
Wear approved respirators if ventilation is not adequate.  
No eating, drinking and smoking when handling the product.  
Wash hands thoroughly after handling.  
**NEVER** add water to acid.

## 7.2 Conditions for safe storage, including any incompatibilities

Store in a cool, well-ventilated area, away from incompatible substances. Protect from physical damage.  
Keep out of sun and away from heat (more than 275 °C).  
If stored in metal containers, vapours can contain explosive hydrogen gas.  
Do not smoke in storage area.

## 7.3 Specific Use(s)

No data available.

# 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

## 8.1 Control parameters

Components with critical values that require monitoring at the workplace:

### Sulfuric acid:

Limit value (8h): 1 mg/m<sup>3</sup>

Limit value (Short term): 3 mg/m<sup>3</sup>

## 8.2 Exposure controls

**Appropriate engineering controls** Good general ventilation should be provided to keep vapour and mist concentrations below the exposure limits.

Eye/face protection: Wear safety glasses with non-perforated shields. Add a face shield (close-fitting) if pouring liquid. For leak, spills emergency or heavy handling, use chemical safety goggles or a full face shield. Do not wear contact lenses.

Respiratory protection: Not required when using a closed ventilation system. If acid concentration is above 1 mg/m<sup>3</sup>, wear a gas mask with acid gas canister equipped with particulate filter. If the concentration is higher than 10 mg/m<sup>3</sup>, use an efficiency particulate respirator, or self-contained breathing apparatus with full face piece.

Other: Wear acid resistant gloves (preferably rubber), boots; long sleeve wool, acrylic, or polyester clothing under an acid proof suit. Trouser legs should be outside boots. An apron can be used in place of acid proof suit in laboratory environment, or in handling small volumes of sulphuric acid. In case of emergency, wear a complete acid suit with hood, boots, and gloves with respiratory protection.

**Environmental exposure controls** Avoid release to the environment
