

The **CLIA solution** is the result of many years of close cooperation between the companies of the BioVendor Group - TestLine, DiaSource ImmunoAssays® and BioVendor R&D and our partners Stratec and Diatron, which are the producers of the KleeYa® automated platform.

Our goal is to **bring to the market a fully automated solution**, unique in its diagnostic scope, reliability and level of technological sophistication.

Its fulfilment is only the first step on the way to better and more accessible diagnostics, which continues with many other milestones in the form of expanding the portfolio of innovative and established parameters.

We believe that synergistic cooperation is the key to faster development of quality and reliable diagnostic kits that over and over again exceed the limits of existing clinical diagnostics.

CLIA

Fully automated CLIA solution.
An attractive portfolio of innovative and established diagnostic parameters combined with a state-of-the-art CLIA analyzer forms a comprehensive, fully automated system for any diagnostic laboratory. Versatile, fast, smooth, intuitive - this is the CLIA solution by BioVendor Group.
